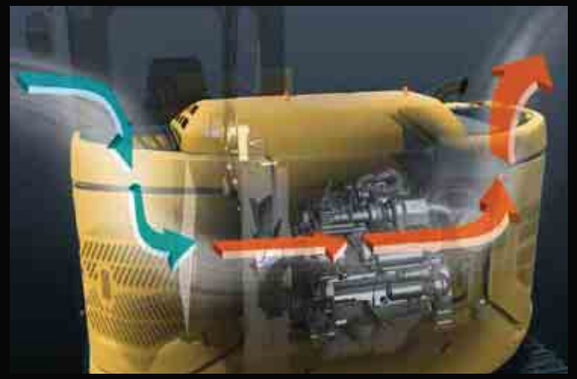
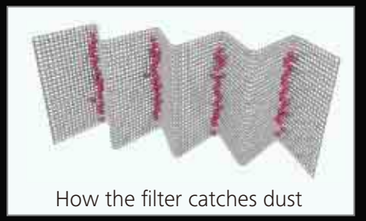
EASY MAINTENANCE



iNDr

A high-density, stainless steel mesh filter, blocks debris from clogging the machine's coolers while promoting easy clean out without tools. The ridges of the corrugated filter allow the air to pass through, and the grooves collect the dust, which prevents the filter from clogging.

iNDr Integrated Noise & Dust Reduction Cooling System



How the filter catches dust

iNDr Filter

The corrugated design of the iNDr filter helps prevent the cooling system and air cleaner from clogging with dust while also reducing noise and maintenance to promote a cooler, more reliable hydraulics system and engine.

Standard FOPS overhead cab guard

The standard FOPS guard can be tilted open for easy window cleaning. Meets standard FOPS, Top Guard Level II requirements. (ISO10262)

Ground level storage compartment access

Two-stage air filter

Remote fuel tank drain valve

Easy-access oil drain valve

Bringing KOBELCO quality to North America and the world

KOBELCO craftsmanship is based on 90 years of experience building excavators with advanced engineering practices and modern inspiration.
"Made by KOBELCO" guarantees quality around the world, overseen from our headquarters in Japan. Every KOBELCO excavator is built to the same exacting standards no matter where the excavator is produced.

In 1930, Kobe Steel manufactured Japan's first electric shovel, which was followed by the first hydraulic excavator in 1963. Since then, the KOBELCO brand has become known for groundbreaking machinery that excels at every task from civil engineering to recycling.

KOBELCO manufacturing is done in multiple production facilities around the world.
Since 2016, our plant in Moore, South Carolina has provided assembly, paint, and shipment lines to serve all of North America.
